Optional functions

Wired Remote
Controller

Devices of the Noxa Cool series are distinguished by discreet operation, optimal functionality and ease of use. The units are available in four capacity levels, covering the range from 2.6 to 7.0 kW. The air conditioner is equipped with a panel of white color with a delicate border in a shade of gray, which, due to its simplicity, perfectly fits into any environment. The device is perfect for efficient cooling, but also for heating rooms. It is characterized by an optimal selection of utility functions.

Wi-Fi Control

The unit is equipped with a Wi-Fi module, which provides remote control of the air-conditioning system from anywhere in the world. Free NetHome Plus application is available for smart devices with Android and iOS systems.

ECO

Thanks to the ECO function, the unit intelligently adapts the fan speed and compressor operation. This brings up to 60% reduction of the current consumption and means significant savings.

noxa

Follow me

Wired remote controller with a built-in thermistor, which allows to present the actual room temperature.

1 W in stand by mode

This function allows the unit to automatically enter standby power saving mode. This reduces power consumption from the normal 4 ~ 5 W down to 0.5 ~ 1 W, representing an 80% saving.

8° heat (frost protect)

In the heating mode, the air-conditioner maintains a minimum temperature hold of 8°C. This protects the room from considerable cooling down during longer periods of user absence in winter.

Refrigerant leakage detection

The module indicates refrigerant leakage based on the unit's operating parameters.

| Operating temperature ranges (outdoor) | Cooling | | °C | -15 ~ 50 | | | |
| | Heating | | °C | -20 ~ 30 | | | |

Capacity is based on the following conditions:
Cooling: indoor temperature 27°C DB/19°C WB; outdoor temperature 35°C DB/24°C WB
Heating: indoor temperature 20°C DB/15°C WB; outdoor temperature 7°C DB/6°C WB
Installation length: length of connected pipes is 7,5 m; the height difference is 0.
The units contain fluorinated greenhouse gasses.
The noise levels can vary depending on method and conditions of measurement.
